

WEARING A MASK EVEN AFTER VACCINATION

MYTH: "I'm vaccinated so I don't need to wear a mask anymore."

NOT TRUE

SPREAD TRUTH NOT THE VIRUS

COVID-19
A HIGHLY INFECTIOUS RESPIRATORY DISEASE SPREAD THROUGH AEROSOL DROPLETS

MASKS PROTECT ENTRY AND EXIT OF VIRAL DROPLETS

WHEN YOU OR THE PEOPLE AROUND YOU **BREATHE** —
TALK —
COUGH —
OR **SNEEZE** —

THE NOSE & MOUTH ARE MAJOR PORTALS OF ENTRY FOR VIRUSES INCLUDING COVID-19

COVID VACCINES ARE SAFE & EFFECTIVE. THEY PREVENT PEOPLE FROM GETTING SERIOUSLY ILL WITH COVID-19

DEFEND YOURSELF

FOR YOU, YOUR FAMILY, YOUR FRIENDS *and* YOUR COMMUNITY

VACCINATED PEOPLE CAN STILL GET INFECTED WITH COVID AND CAN UNKNOWINGLY SPREAD THE DISEASE.

REMEMBER:

SOME PEOPLE CANNOT GET VACCINATED BECAUSE THEY ARE IMMUNOCOMPROMISED, MAKING IT IMPORTANT FOR THE REST OF US TO HELP STOP THE SPREAD

WEAR A MASK IN CROWDED OR CLOSED SETTINGS

YOU DON'T KNOW WHO IS VACCINATED

AS MUCH AS WE'D LIKE TO HOPE, THE VACCINE DOES NOT MEAN A RETURN TO NORMAL

PREVENTION IS BETTER THAN TREATMENT

WASHING YOUR HANDS AND HAVING A HEALTHY LIFESTYLE ALSO PLAY A ROLE
